

Video Series Plan

A to Z

An introduction video, then a complete training series for the web shop and the phone app: every screen, in the order a shop meets it, with what to show, what to say and where it is.

Record with the live demo: **budget-dynamics.schooldynamics.ug/demo** · demo@schooldynamics.ug · demo2026 · till PIN 1234

Series 0 · A–P (17 playlists)

Covers Web shop, phone app, supermarket features, modules

Episodes 1 introduction + 89 training videos

Version September 2026

Contents

1. O. Introduction video: "Budget Pro in 3 minutes"
2. A. Getting started
3. B. Selling at the till (web)
4. C. After the sale
5. D. Products and the catalogue
6. E. Stock
7. F. Customers and debts
8. G. Suppliers and purchasing
9. H. Money
10. I. Reports
11. J. Promotions, loyalty and gift cards (supermarket features)
12. K. Team, roles, PINs and chat
13. L. Settings
14. M. Plan and billing
15. N. The phone app (Android)
16. O. Extra modules
17. P. Tips, troubleshooting and FAQ

How to use this plan

Each episode has the same parts:

Part	Meaning
Where	The menu path and web address (or phone app path) you open on screen
Show	What to click, step by step, in the order to record it
Say	The points to mention while showing it
Hook	The "wow" moment worth slowing down or zooming in on
Watch out	Traps to avoid on camera, or things to set up before recording

Which account to record with

For	Use	Why
Most training episodes	Public demo: /demo, then "Open the demo shop" (demo@schooldynamics.ug / demo2026, till PIN 1234)	It already has 60 days of trading, photos, debts, suppliers, promotions and a team, in US dollars, which suits an international audience.
Sign-up, the setup wizard, team invites, currency change, plan payment, deleting a shop	A fresh trial shop made with a throwaway email	These are locked in the public demo on purpose, so it stays usable for everyone.
East African shillings, mobile money and M-Pesa/MTN examples	A trial shop set to Uganda (UGX) or Kenya (KES)	Shows local currency, whole-number prices and mobile money networks.
Phone app episodes	The same demo sign-in on an Android phone, or the app's own "Try the demo shop"	The phone demo ("Mama Rose Shop") never leaves the phone. It is ideal for practice.

The public demo repairs itself every hour and is rebuilt from scratch every 3 days. If a take goes wrong, the next hour puts the settings back. Plan big recording days just after a rebuild (the date is shown on /demo).

Recording tips

- Record the web at **1440 × 900** and zoom to 125% for small buttons. Record phone screens with the phone's own screen recorder.
- Turn on **Supermarket mode** only in the supermarket episodes (the demo has it on). For "a small shop" episodes, show a trial shop with it off. That shows Budget Pro stays simple until you want more.
- Hide your notifications.** Use a clean browser profile with no extensions.
- Keep each training video to **3–7 minutes**, with one job per video. Say the menu path out loud: "Sidebar, Shop, Products."
- Always end with a next step:** "Next video: receiving stock."

Series map

#	Series	Episodes	Audience
O	Introduction: Budget Pro in 3 minutes	1	Everyone, the public
A	Getting started	A1-A6	New owners
B	Selling at the till (web)	B1-B9	Owners and cashiers
C	After the sale: sales, returns, receipts	C1-C4	Owners, managers, cashiers
D	Products and the catalogue	D1-D6	Owners, stock keepers
E	Stock	E1-E8	Stock keepers, managers
F	Customers and debts	F1-F4	Owners, managers
G	Suppliers and purchasing	G1-G4	Owners, stock keepers
H	Money: shifts, cash-up, expenses	H1-H5	Owners, managers, accountants
I	Reports	I1-I4	Owners, accountants
J	Promotions, loyalty and gift cards	J1-J4	Supermarkets and larger shops
K	Team, roles, PINs and chat	K1-K4	Owners
L	Settings	L1-L7	Owners
M	Plan and billing	M1-M2	Owners
N	The phone app	N1-N14	Everyone who sells on a phone
O	Extra modules: Poultry farm, Budgets & pledges	O1-O3	Farms, churches and groups
P	Tips, troubleshooting and FAQ	P1-P5	Everyone

Recording order. Record O, then A, then B, and so on. Publish in playlists per series. Link A1 from the website's home page.

0. Introduction video: "Budget Pro in 3 minutes"

Goal: someone who has never heard of Budget Pro understands what it does, and wants to try it.

Length: 2:30–3:30.

Record in: the public demo, plus the phone app.

Script beats

Time	Beat	On screen	Say (idea, not word for word)
0:00	Hook	Airplane mode on a phone, then a sale completes, then the WhatsApp receipt arrives	"The network is gone, and this shop is still selling. When it comes back, everything catches up."
0:12	The problem	A paper book, a calculator, a drawer of cash	"Most shops still run on a book and memory: who owes what, what's left on the shelf, whether today made money."
0:25	What it is	Home page, then the dashboard	"Budget Pro is the till, the stock book and the debt book for your shop, on your phone and any computer."
0:40	Hook 1: sell in seconds	Web till: scan, then Pay, then the receipt on WhatsApp	"Scan or tap, take cash, card or mobile money, and send the receipt on WhatsApp."
0:58	Hook 2: works offline	The phone chip goes from "3 waiting" to "Synced"	"Every sale is saved on the phone first. Several phones stay in step."
1:12	Hook 3: stock that adds up	Products with photos, "Running low", receiving a delivery by scanning	"Know what's on the shelf, what's running low and what to order. Receive a delivery by scanning it."
1:30	Hook 4: the debt book	Debtors & creditors, then "Share balance on WhatsApp"	"Credit sales, part payments and polite reminders. Always know who owes you."
1:45	Hook 5: real profit	Dashboard cards, then Reports, then the PDF	"Not just sales: profit after costs, expenses and cash-up differences."
2:00	Hook 6: your team, your rules	Team roles, the supervisor PIN pad, the note-by-note cash-up	"Give cashiers only what they need. Supervisor PINs for refunds. Every shift counted."
2:15	Grows with you	Supermarket settings: promotions, loyalty, scale barcodes	"From a kiosk to a supermarket: switch on promotions, loyalty, weighed items, several stores."
2:30	Anywhere	Country list, currency, languages (English, Kiswahili, Luganda on the phone)	"Your currency, your tax rate, your language."
2:40	Try it	/demo, then "Open the demo shop"; the sign-up page	"Walk around a real shop now, no sign-up. Or open your own shop: 14 days free, no card."
2:55	End card	Logo, website, Play Store badge	"Budget Pro: your shop's book, even when the network isn't."

Watch out:

- Keep it about outcomes, not menus.

- Do not show prices in more than one currency; stay in the demo's USD.
 - Record the offline moment on a real phone.
-

A. Getting started

A1. Try the live demo first (no sign-up)

- **Where:** home page, "Try the live demo" (or /demo). The same link is on the header "Live demo" and the sign-in page ("Just looking? Open the demo shop").
- **Show:**
 1. The /demo page: what's inside, and the sign-in with copy buttons (email, password, till PIN).
 2. Click "Open the demo shop". You land on the dashboard.
 3. Point at the dashboard strip "Demo shop..." and the pulsing top-bar button "Create your own shop".
 4. Open that button's dialog, then "Keep looking around".
- **Say:**
 - Everyone shares the demo, so don't type anything private.
 - It repairs itself hourly and is rebuilt every 3 days.
 - Messages and payments are switched off in it.
 - The same sign-in works in the phone app.
- **Hook:** one click into a shop with two months of real-looking trading.

A2. Create your shop (sign up)

- **Where:** /register ("Open my shop free").
- **Show:** Shop name, Your name, Phone or email, **Type of business** (22 types in groups), Password, **Country** ("Shop in Uganda, prices in UGX. Not in Uganda? Change"). Then "Create my shop".
- **Say:**
 - The country sets the currency, the shop's clock and the VAT rate.
 - 14 days free with no card. After that you can stay on the Free plan.
- **Hook:** it's ready in about a minute. The business type decides the starter product list.
- **Watch out:** use a throwaway email. Sign up twice to show a UGX shop and a USD shop.

A3. The setup wizard (/welcome)

- **Where:** it opens automatically after sign-up. The top-bar pill "3/8" returns you to it.
- **Show** each step: **Your business, then Products, then Money, then Team, then First sale, then Phone app.**
 - **Your business:** icon grid "What do you sell?", country, currency (locked once there are sales), time zone, VAT %, phone, address.
 - **Products:** three tabs.
 - *Start from a template:* tick products and edit prices inline; "Also sell..." mixes in other lists; "Opening stock for all ticked".
 - *Import a file:* CSV or XLSX, "Download a template", then a preview.
 - *Add one by one.*

- **Money and receipts:** payment methods; mobile money provider and payout number; send receipts by WhatsApp, SMS or Printer; what to do when a product runs out; "cashiers must open a shift".
- **Team:** up to 3 invites, with "Copy link" and "WhatsApp".
- **First sale:** "Open the till" (starts the till tour).
- **Phone app:** QR code and "Open Google Play".
- **Say:**
 - Every step can be skipped and finished later.
 - The phone app resumes the wizard at the same step.
- **Hook:** the template packs come with typical local shelf prices, so you're ready to sell in 3 minutes.

A4. The getting-started checklist and the till tour

- **Where:** Dashboard, the "Getting started" card; /sell?tour=1.
- **Show:**
 - The 8 items: add products, price every product, first sale, a team member signed in, mobile money, a receipt sent, sign in on the phone, choose a plan.
 - The four coach marks of the till tour.
 - The "First sale done. Well done!" message.
- **Say:** the checklist disappears once you're set up, or you can dismiss it with x.

A5. A private demo shop of your own

- **Where:** in the wizard, "Try a demo shop" (header button).
- **Show:**
 1. The demo fills itself with two months of sample trading.
 2. The banner "You're in a demo shop... Deleted after a week".
 3. "Back to my shop" and "Delete demo".
- **Say:**
 - It is separate from your real shop.
 - Your phone app stays in your real shop.
 - Nothing is ever sent from the demo.

A6. A tour of the screen (the shell)

- **Where:** any page.
- **Show:**
 - **Sidebar:** Dashboard, Chat, Sell, Sales, Promotions / Shop / Money / Settings. "Classic screens" and "Sign out" are at the bottom.
 - **Top bar:** the plan chip, **Search (Ctrl K)**, Chat, the bell, "Sell", and the user menu (My profile, Chat with support, Change password, Sign out).
 - **On a phone-sized window:** the bottom tab bar Home, Sell, Chat, Products, Menu.
 - The list keys **/**, **n**, **j** / **k**, Enter and **?**, and "peek" dialogs.
- **Hook:** in Ctrl K type "sell 2 rice". The till opens with 2 rice already in the cart.

- **Say:** you only see what your role allows, and switched-off features stay hidden.
-

B. Selling at the till (web)

B1. Your first sale

- **Where:** Sidebar, Sell (/sell), or the green "Sell" button in the top bar.
- **Show:**
 1. Search or scan ("Search or scan a barcode..."), then Enter to add. Or tap product tiles (with photos).
 2. Category chips; Tiles or List view.
 3. Cart: – / +, type a quantity, tap the price to change the price, discount or unit.
 4. "Pay {total}" (F4), then "Take payment": Cash, "Exact" and note buttons, change due, "Complete sale" (Ctrl+Enter).
 5. "Sale recorded": the change, "Print (80 mm / 58 mm)", "PDF", "Share", "Send the receipt on WhatsApp", "New sale".
- **Hook:** a full sale with the keyboard only (F2, then Enter, then F4, then Ctrl+Enter).
- **Watch out:** if the shop requires shifts, the till says "Open a shift before you sell". Open one first (see H1).

B2. Payments: split, mobile money, card, credit

- **Where:** the "Take payment" dialog.
- **Show:**
 - Pick a method, then the amount and a reference.
 - "Split payment" (cash + card).
 - "Credit (pay later)", which needs a customer: "{name} will owe X".
 - Mobile money with its transaction reference.
- **Say:** credit sales go straight into the debt book (Series F), and part-payments are allowed.

B3. Customers at the till

- **Show:**
 - "Customer (optional)" (F7): search, or "New customer" (Name, Phone), then "Use this customer".
 - With loyalty on: tier (Silver/Gold), points and store credit.
- **Say:** linking a sale to a customer builds their history, statement and loyalty points.

B4. Discounts, notes, backdating and holds

- **Show:**
 - The "Discount, note, date, location" expander: whole-sale discount, note, sale date (if permitted), sell-from location.
 - Line discount from the cart.
 - "Hold" (F8/F6) and "Held (n)" to restore.
- **Say:** held sales can be resumed on another till when "Held carts" is on.

B5. The keyboard map: sell like a pro

- **Show:** press F1 or **?**. Then F2 search, F4 pay, F7 customer, F8 hold, F9 no sale, **F10 price check**, + / -, Alt+1...9 favourites, **3*** **then an item** for quantity, **+** to repeat, and Esc.
- **Hook:** F10 price check scans an item without adding it to the sale.

B6. Printing, the cash drawer, the scale and the customer display

- **Where:** the till settings panel (sliders icon).
- **Show:**
 - "Large text".
 - **Hardware** (Chrome or Edge on a computer): "Connect printer (USB / serial)", paper width, "Test print", "Open drawer"; "Connect scale" with live kg; label printer.
 - Customer display: open /sell/display on a second screen.
- **Watch out:** this needs Chrome or Edge and a USB device. Record it only if you have the hardware.

B7. Training mode: practise without recording

- **Where:** till settings, "Start training" (managers and owners).
- **Show:** the training banner, a "Training sale" receipt marked "TRAINING — not a sale", then stop training.
- **Say:** perfect for a new cashier's first day. Nothing is saved.

B8. The offline web till

- **Where:** Settings, Business settings, Supermarket, "**Web till keeps selling offline**", set to "Always on". It is off by default.
- **Show:**
 1. Unplug the Wi-Fi. The strip reads "Offline — sales are saved on this computer".
 2. Make a cash sale and print the provisional receipt.
 3. Reconnect: "N offline sales waiting", then "Sync now".
- **Say:** offline, the web till takes cash and mobile money at shelf prices only. Promotions and customers come back when online.
- **Hook:** the till keeps selling with the network cable pulled out.

B9. Supermarket lane extras

- **Where:** the till, with Supermarket mode on (the demo has it on).
- **Show:**
 - **Weighted items:** scan a scale label, or type a PLU such as **4011** for bananas, then "Enter the weight".
 - **Age check** on beer or wine: "Yes, ID checked".
 - **Department keys** (open price).
 - Pack barcodes: a carton scans as a carton.
 - "Take back empties" (deposits), "Sell a gift card", **No sale** with a reason.
 - **Supervisor PIN pad:** a price cut over 10% asks for a PIN (the demo PIN is 1234).

- Cash rounding and note buttons.
 - **Hook:** the supervisor types a PIN on the cashier's screen, and the cashier never signs out.
-

C. After the sale

C1. The Sales list

- **Where:** Sidebar, Sales (/sales).
- **Show:**
 - The "Today" strip.
 - Search "Receipt, customer or phone..."; date range.
 - Chips: All / Not fully paid / Part paid / Not paid / Paid.
 - Filters: Status, Paid by, Sold by.
 - "Export CSV / Excel".
 - Bulk: tick sales, then "Send receipts".
- **Say:** every figure on the dashboard clicks through to this list.

C2. Inside a sale (the sale peek)

- **Show:**
 - Items, payments, figures (Total, Paid, Still owed, **Profit**).
 - "Take payment", "Print receipt", "Download PDF", "Invoice (PDF)", "Edit customer / notes", "Send receipt".
 - **"Request mobile money"** (the customer approves on their phone).
 - WhatsApp / SMS / Call buttons.

C3. Returns and exchanges

- **Show:**
 - "Return items": quantity per line, condition ("back on shelf" or not), reason, "Give money back by".
 - **Exchange:** add the new items, and only the difference is paid.
 - "Return without receipt" (supermarket): refund at the lowest price in the last 30 days, with a supervisor PIN, optionally onto a gift card.
- **Say:** returned stock goes back on the shelf only if you say so. Damaged goods don't.

C4. Voids and reversing a payment

- **Show:** "Void sale" (reason, supervisor PIN); "Reverse" on a single payment.
- **Say:** nothing is ever hard-deleted. Voids leave a clear trail, and stock and cash are put back.

D. Products and the catalogue

D1. The Products list

- **Where:** Sidebar, Shop, Products (/products).
- **Show:**
 - The cards: Products, Stock value at cost, at selling price, Running low, Out of stock.
 - Chips: Active, Running low, Out of stock, No buying price, Inactive.
 - Filters and price/stock ranges.
 - **Inline editing:** click a price or reorder level to change it in place. The "On sale" switch.
- **Hook:** changing a price inline, in place, without opening a form.

D2. Adding a product properly

- **Show:** "New product".
 - **Photo** (drag and drop); name; category and sub-category with quick "New category".
 - Selling and buying price (live margin); SKU (made for you); **Barcode** ("Scan it into this box").
 - Unit; reorder level; opening stock.
 - "Count stock for this product"; "Track batches and expiry dates".
- **Say:** the buying price is what makes profit reports true. The chip "No buying price" finds products that are missing one.

D3. Packs, units and several barcodes

- **Where:** product form, "Barcodes per pack"; Products, Units (/products/units).
- **Show:** a unit "Carton" made of 24 pcs; a 6-pack and a carton, each with its own barcode and price.
- **Say:** scanning the carton sells one carton, and stock drops by 24.

D4. Import, export, duplicates and bulk changes

- **Show:**
 - **"Import":** a spreadsheet, with a preview of price, cost and barcode changes.
 - "Export" to Excel.
 - "Possible duplicates", then "Merge".
 - Bulk bar: "Change prices" by % with rounding and a preview; "Put on sale"; "Deactivate"; "Print labels".
- **Hook:** raise every price in a category by 5%, rounded to nice prices, with a preview.

D5. The product peek: history, prices and scheduled changes

- **Show:**
 - Figures (in stock, margin, sold in 30 days), "Where it is", "Batches on the shelf", timeline.
 - "Change price": suggested round prices, cost + margin %, **schedule for later**.
 - Price history; prices by level and quantity (supermarket); supplier costs.

- **Hook:** in the demo, the coffee price rise is already scheduled for next Monday.

D6. Categories, labels and shelf labels

- **Where:** Products, Categories (/products/categories); Print labels; Shelf labels (/products/shelf-labels).
 - **Show:**
 - Categories with expected and earned profit.
 - Barcode or QR labels.
 - The shelf-label queue (filled automatically when prices change).
 - Print sheet or ZPL.
-

E. Stock

E1. Stock movements: the stock ledger

- **Where:** Sidebar, Stock, Stock movements (/stock/movements).
- **Show:**
 - Chips: Stock in / out / Sales / Damage & loss / Counts & corrections / Undone.
 - "New movement" with reason and a **photo of the damage**.
 - "Undo" (with a reason).
 - "Export".
- **Say:** every unit in or out has a line here: who, when and why.

E2. Receive stock (a delivery)

- **Where:** Stock, Receive stock (/stock/receipts).
- **Show:**
 1. "Receive stock": supplier, date, invoice number.
 2. **Scan each item as it comes off the truck.**
 3. An unknown barcode: link it, or create the product on the spot.
 4. Quantity, cost, **batch number and expiry**.
 5. "Paid now" or "Paid in full".
- **Hook:** scanning a delivery in, then creating a missing product mid-scan.

E3. Landed cost

- **Show:** "Add a delivery cost" (Transport, Duty, Handling, Clearing), spread by value or quantity. The product's cost now includes it.
- **Say:** your margin is finally the real margin.

E4. Stock counts (stock take)

- **Where:** Stock, Stock counts (/stock/counts).
- **Show:**
 - "Start a stock count": whole shop, one category, or **one aisle** (e.g. A3).
 - The count sheet: scan or type. Filters: Not counted / Differences / Count again.
 - The cards: value of the difference.
 - "Review and post".
- **Say:** sales made during the count stay correct, because the system figure is snapshotted.
- **Hook:** the demo has a "Drinks aisle count" half done. Finish it on camera.

E5. Transfers, locations and stock requests

- **Where:** Stock, Transfers & locations (/stock/locations).
- **Show:**

- Locations; "Which phone sells where"; "Move stock between locations".
- **Stock requests:** "Ask for stock", then approve, then send (truck), then "Receive" by scanning.
- **Watch out:** it needs a plan with several locations (Business or Enterprise). A single-shop account sees the upsell.

E6. The reorder list

- **Where:** Stock, Reorder list (/stock/reorder).
- **Show:** sells/day, "Lasts N days" (red if shorter than the supplier's lead time), order quantity. Then **"Create N draft orders"**.
- **Hook:** one click turns the list into purchase orders, one per supplier.

E7. Short-dated stock and markdowns

- **Where:** Stock, Short-dated (/stock/expiring).
- **Show:**
 - Batches expiring and value at risk.
 - "Mark down" 30%, then "Mark down and print label". The label scans at the till at the reduced price.
 - "Return to supplier" or "Write off".
- **Hook:** the demo's yogurt near its date is already marked down.

E8. Returns to supplier

- **Where:** Stock, Returns to supplier.
 - **Show:** "Return goods": lines, reason, refund received. What isn't refunded comes off what you owe.
-

F. Customers and debts

F1. Customers

- **Where:** Sidebar, Shop, Customers (/customers).
- **Show:**
 - The strip (customers, owe you, total owed).
 - Chips; "New customer" with **credit limit**, pays-within days and price level.
 - The consent switches: "Agrees to offers and news" and "No messages at all".
- **Say:** opted-out customers can still be called, but they are never messaged.

F2. A customer's account

- **Show:**
 - The peek: unpaid sales, statement, loyalty.
 - "Statement (PDF)"; "**Share balance on WhatsApp**"; "Send reminder"; "New sale" (opens the till with this customer).

F3. The debt book: Debtors & creditors

- **Where:** Sidebar, Shop, Debtors & creditors (/debts).
- **Show:**
 - Tabs "Debtors · owe you" and "Creditors · you owe".
 - Oldest unpaid first; "Receive" or "Record payment".
 - **Name-only debtors**, then "Make customer".
- **Say:** payments settle the oldest sales first.
- **Hook:** in the demo, James Carter is overdue and the Harbor Café buys on account.

F4. Automatic debt reminders

- **Where:** Business settings, Customers & debts.
- **Show:** "Customers pay within (days)" and the weekly friendly reminder switch. Then the bulk "Send reminders" on Customers.
- **Watch out:** the public demo never sends messages. Say so on camera.

G. Suppliers and purchasing

G1. Suppliers

- **Where:** Sidebar, Shop, Suppliers (/suppliers).
- **Show:**
 - "New supplier": phone for WhatsApp orders, pay-within days, days to deliver.
 - "Pay supplier".
 - The peek: deliveries, orders, statement, **Scorecard**.

G2. Purchase orders

- **Where:** Stock, Purchase orders (/stock/orders).
- **Show:**
 1. "New order", then **"Send" on WhatsApp** (the message is written for you).
 2. "Receive" against the order ("Everything else arrived as ordered").
 3. The % received bar and late highlighting.
- **Hook:** the order lands on the supplier's WhatsApp in one tap.

G3. What you owe suppliers

- **Show:** the dashboard's "You owe suppliers", then "Pay"; Creditors tab; supplier statement PDF.

G4. Supplier prices and consignment (supermarket)

- **Show:** supplier price history on the product peek; consignment stock on the supplier ("Settle" what was sold).

H. Money

H1. Opening a shift

- **Where:** Money, Shifts & cash-up (/money/shifts).
- **Show:** "Open shift" with an opening float; the current shift panel with money by method.
- **Say:** turn on "Cashiers must open a shift" in Stock rules to make it compulsory.

H2. Cash in and out of the drawer

- **Show:** "Cash drop", "Pay out" (becomes an expense), "Pay in", "From the safe", "No sale". Each prints a slip.

H3. Closing and counting (cash-up)

- **Show:**
 - "Close & count cash": the **note-by-note counter** and coins.
 - The live "**Balances exactly**" / "**Short by**" / "**Over by**", and the note that explains a difference.
 - Blind cash-up: the expected cash is hidden.
- **Hook:** the variance appears the moment the last note is counted.

H4. X and Z reports

- **Show:** "X report" (mid-shift figures that change nothing); "**Close the day (Z)**", numbered and unchangeable, with an 80 mm print and PDF.

H5. Income & expenses, and financial periods

- **Where:** Money, Income & expenses (/money/records); Money, Financial periods (/money/periods).
 - **Show:**
 - "+ Expense": amount, category, paid with, **receipt photo**.
 - Categories.
 - Automatic entries are locked and link to their source.
 - Periods: "Make active", "Close" (locks entries), "Reopen".
 - **Say:** rent, wages and bills go here, so net profit is true.
-

I. Reports

I1. The dashboard in depth

- **Where:** Dashboard.
- **Show:**
 - Period chips (Today ... This year, Dates).
 - The cards with ▲/▼ against the previous period.
 - The alert strip; Sales & profit chart; best sellers; customers owe you; you owe suppliers; stock value.

I2. The reports catalogue

- **Where:** Money, Reports (/reports).
- **Show:** "Today at a glance"; **"Send to my WhatsApp"**. The 23 reports:
 - **Sales and profit:** Sales summary (by day, method, cashier, customer, category, product), Profit & margin, Category & margin, Income statement (P&L), VAT summary.
 - **Stock:** Stock on hand & value, Low stock, Dead stock, Best sellers, ABC analysis & days of cover, Stock movement audit, Expiring stock, Shrink (write-offs).
 - **Money:** What customers owe (aging), What we owe suppliers, Cash-up by shift, Cash control by cashier, Purchases.
 - **Growth:** Basket & busy hours (heatmap), Promotion results, Gift cards/credit/points, Supplier scorecard.

I3. Reading one report and exporting it

- **Show:** period chips, "More periods" (including Financial period), the chart and table, **"PDF"** and **"Excel"**.
- **Hook:** the "Basket & busy hours" heatmap shows your busiest hour.

I4. The 8 pm daily summary

- **Say:**
 - Every evening at 20:00 (shop time) the owner gets the day's summary.
 - At 08:00, a notice about low stock and short-dated stock.
 - The bell shows the same notices.

J. Promotions, loyalty and gift cards (supermarket features)

J1. Promotions

- **Where:** Sidebar, Promotions (/promotions).
- **Show:**
 - "New promotion": % off, amount off, promo price, buy X get Y, any N for a price, bundle, spend and save, coupon.
 - Targets, days, **happy-hour times**, limit per sale.
 - The till applies the best deal automatically.
- **Hook:** the demo's "Croissants 3 for \$5" appears on the receipt by itself.

J2. Coupons

- **Show:** the coupon WELCOME5 (\$5 off \$30); the "Coupon code" box at the till, then "Apply".

J3. Loyalty points

- **Where:** Settings, Supermarket: spend per point, point value, Silver/Gold thresholds.
- **Show:** the customer chip at the till (tier, points) and the "Points" tender.

J4. Gift cards and store credit

- **Show:** "Sell a gift card" (the code is shown once); the "Gift card" and "Store credit" tenders; refunding onto a gift card.

K. Team, roles, PINs and chat

K1. Inviting your team

- **Where:** Settings, Team (/team).
- **Show:** "Invite someone" (link by WhatsApp/SMS/email, "Copy link"); "Add with a password"; the invite page /invite/... ("Join {shop}").
- **Watch out:** adding people is locked in the public demo. Record this in a trial shop.

K2. Roles and permissions

- **Show:**
 - The roles: Owner, Manager, Cashier, Stock keeper, Accountant, Viewer.
 - The **"Role permissions"** matrix (18 permissions) and reset-to-standard.
 - Sign in as a cashier to show the smaller menu.
- **Say:** billing, team and settings stay with the owner.

K3. Till PINs and supervisor approvals

- **Show:**
 - "Set till PIN" (# icon) on Team, or "My till PIN" on Shifts.
 - The PIN pad at the till for voids, refunds, price cuts, no sale and write-offs.
- **Say:** each approval is used once, expires in 10 minutes, and is logged.

K4. Team chat

- **Where:** Chat (/chat); top-bar chat icon.
 - **Show:**
 - "New chat", "Message the whole team".
 - A photo attachment; "Sent/Seen" ticks and typing; delete a message.
 - **Say:** messages stay inside your shop. They also work on the phone.
-

L. Settings

L1. Business profile, receipts and payment methods

- **Where:** Settings, Business settings (/settings).
- **Show:**
 - Business profile (logo upload).
 - Receipts & payments: methods, send-by, header and footer with the **live receipt preview**.

L2. Money & tax, and changing the currency

- **Show:**
 - Currency, timezone, VAT.
 - **"Change":** "Correct the currency only", or "Convert every amount" at one rate, with before-and-after examples, then your password.
- **Hook:** the conversion preview.
- **Watch out:** locked in the demo. Record it in a trial shop that has a few sales.

L3. Stock rules, and customers & debts

- **Show:**
 - Selling more than is in stock: allow and warn / allow silently / block.
 - Default low-stock level; require a shift.
 - Credit days; reminders.

L4. What you use (modules) and mobile money

- **Show:**
 - Switch modules on and off: Shop, Income & expenses, Budgets & pledges, Poultry farm. Nothing is deleted.
 - Mobile money payout setup, which lets the till request payments.

L5. Supermarket mode and its 34 features

- **Where:** Business settings, the Supermarket card, Edit.
- **Show:**
 - The **Supermarket mode** master switch.
 - Each feature set to Follow the mode / Always on / Always off.
 - The settings: cash rounding, note buttons, PIN override %, write-off limit, scale barcode format, loyalty values, short-dated days, minimum age, prices include tax.
 - **Tax classes** (Standard / Zero-rated / Exempt).
- **Say:** a shop that never touches this sees the simple Budget Pro.

L6. Fiscal receipts (e-invoicing)

- **Where:** Business settings, Fiscal / e-invoicing (owner).
- **Show:** connector (Uganda EFRIS or Manual), Sandbox or Production, "Test connection", "Send receipts"; "Retry now"; the fiscal QR on receipts.
- **Watch out:** EFRIS still needs certification with a real shop's URA credentials. Show the sandbox only.

L7. Your data: export and closing a shop

- **Where:** Settings, Your data (/settings/data).
 - **Show:** "Export" (zip of CSVs, kept 7 days); "Close the shop and delete" (30-day grace, cancel any time).
 - **Say:** your data is yours. You can take it at any time, even after a plan ends.
-

M. Plan and billing

M1. Plans, limits and paying

- **Where:** Settings, My plan (/plan); public /pricing.
- **Show:**
 - The plans: Starter, Business, Enterprise; Monthly/Yearly ("2 months free").
 - The usage meters.
 - Checkout: **Mobile money** (prompt on the phone) or **Card**.
 - Invoices as PDF.
- **Say:**
 - 14-day trial, then Free.
 - Selling is never blocked by the sales limit.
 - A lapsed paid plan gives 7 read-only days, and nothing is deleted.

M2. Changing, cancelling and renewing

- **Show:** upgrade (unused days become credit); a downgrade scheduled for the period end; "Cancel", "Resume plan", "Renew automatically".
-

N. The phone app (Android)

N1. Install, the intro and sign-up with a code

- **Where:** /get-app (QR to Google Play).
- **Show:**
 - The splash; the three intro slides (Sell in seconds / Works without internet / Know your stock and your money).
 - "Create your shop", then the **6-digit code by WhatsApp/SMS**, then your name, shop and password.
- **Watch out:** phone sign-up offers Uganda, Kenya, Tanzania and Rwanda. Other countries sign up on the web first, then log in on the phone.

N2. The phone setup wizard

- **Show:** Business, Products (template, import, one by one; works offline), Money, Team (share invite links), First sale.
- **Say:** it's the same wizard as the web and continues where you stopped.

N3. Home, tabs and badges

- **Show:**
 - The tabs **Home · Sell · Chat · Stock · More**, with the raised Sell button and red badges.
 - The Today card; Quick actions; Needs attention; Getting started; Modules; the menu grid.

N4. Selling on the phone

- **Show:**
 - Search or **camera scan**; Bluetooth scanners; 3*code ; long-press a tile for a quantity.
 - The cart: "Charge"; the payment sheet (quick notes, mobile money ID, split, credit to a customer).
- **Hook:** camera scanning at a real shelf.

N5. Receipts on the phone

- **Show:** "Sale complete", then **WhatsApp**, SMS, **Bluetooth print (58/80 mm)**, Share as image, "Request mobile money".

N6. Offline and sync: the key video

- **Show:**
 1. Turn on airplane mode.
 2. Sell. The chip shows "**{n} waiting**".
 3. The temporary receipt number.
 4. Turn internet back on. The chip goes "Syncing", then "**Synced**", and the final receipt number appears.

- 5. More, Sync & data: waiting per type; photos wait for Wi-Fi.
- **Say:** "Everything you do is saved on this phone first." A finished offline sale is never refused.

N7. Sync conflicts: what to do

- **Where:** More, Sync & data, "Needs your attention".
- **Show:** a stock problem ("Count stock" / "Ignore"); a disagreement ("Keep mine" / "Keep server"); "Try again" / "Discard".

N8. Sales history, returns and voids on the phone

- **Show:** filters; "Add payment" (works offline); "Return items" with "Back on shelf"; exchange; "Void sale" with a supervisor PIN.

N9. Shifts and cash-up on the phone

- **Show:** "Open shift"; cash in and out; "Close shift" with the note-by-note count; Over/short; X/Z reports (online).

N10. Customers and the debt book on the phone

- **Show:** "Customers owe you"; "New customer"; the customer page with **WhatsApp** · **SMS** · **Call** (reminder text ready); "Receive payment" (works offline); share as CSV.

N11. Stock on the phone

- **Show:**
 - Products with scan; the product form with **Camera photo**, pack barcodes and batches.
 - Receive stock by scanning; stock counts (recount prompts); stock movements.
 - The Reorder list.
- **Say:** purchase orders, transfers and supplier returns need internet. Everything else works offline.

N12. Money and reports on the phone

- **Show:** Income & expenses; financial periods; reports marked  are worked out on the phone and work offline.

N13. Security PIN, language and logging out safely

- **Show:**
 - More, Security PIN (unlock offline).
 - Language: **English** / **Kiswahili** / **Luganda**.
 - Log out with unsynced work: "Some work is not synced yet", then "Sync now".
- **Hook:** the app protects unsynced sales before logging out.

N14. Chat on the phone

- **Show:** chats; photo from the camera; "Waiting to send" offline, then it sends later; long-press to delete.
-

O. Extra modules

O1. Poultry farm: setting up

- **Where:** Home, the "Poultry farm" card (switch it on in Settings, Modules).
- **Show:** "Add a batch" (Layers / Broilers / Kienyeji); "Load demo farm data"; who is using the app (Owner or Worker).

O2. Poultry farm: daily work

- **Show:**
 - "Daily record" (eggs, deaths, feed, weight).
 - Egg store; egg sales by tray and on credit; feed; health and vaccines.
 - **Tasks with reminders.**
 - Reports and P&L per batch; export CSV.
- **Say:** it works fully offline. Farm expenses flow into Income & expenses.

O3. Budgets & pledges (churches, groups and events)

- **Show:** programs; budget categories and items; "Download budget PDF"; pledges and contributions; "Copy thanks".
-

P. Tips, troubleshooting and FAQ

P1. "I can't see a menu item"

- **Say:**
 - It depends on your role (Team, Role permissions).
 - It depends on the module (What you use).
 - It depends on the supermarket feature (Supermarket card).

P2. Offline questions

- **Say:**
 - The phone does everything offline.
 - The web till sells offline only if "Web till keeps selling offline" is on.
 - Online-only jobs show "Needs internet".

P3. Classic screens

- **Say:** the old screens are still at "Classic screens" (sidebar bottom) for budgets and pledges, device tracking and older reports. Pages open in the new design automatically.

P4. Forgot password and account recovery

- **Show:** /forgot-password, then a code by WhatsApp/SMS or email, then "Save and sign in"; on the phone, "Log in with a code instead".

P5. Getting help

- **Show:** the user menu, "Chat with support" (WhatsApp); /contact.

Appendix 1: Where everything is (A to Z index)

Thing	Web	Phone
Age check	Till, supermarket lane	Sell, before paying

Key	Action
Ctrl+Enter (payment dialog)	Complete sale
F6 / F8	Hold sale
F7	Customer
F9	No sale (open drawer)
F10	Price check
+ / -	One more / less of last line
Alt+1...9	Favourites
3* then item	Quantity for the next item
Esc	Close / clear

Appendix 3: Before you publish, avoid showing these

Thing	Why	Instead
Money dashboard on the phone	Not reachable in the app	Show Home's Today card and Reports
Poultry, Budget, Sync & data and PIN screens in Kiswahili/Luganda	Parts are still English	Record those episodes in English
EFRIS "Production"	Not yet certified with URA	Show Sandbox and say "coming for certified shops"
"Prices include tax" off, on the phone	The phone doesn't add tax on top yet	Keep tax-inclusive prices in videos
Phone sign-up outside UG/KE/TZ/RW	The phone lists four countries	Sign up on the web, then log in on the phone
Real customer phone numbers	Privacy	Use the demo's 555 numbers
Adding team, currency change, paying, deleting in the public demo	Locked there on purpose	Record them in a trial shop

Appendix 4: Recording checklist

- ☐ Clean browser profile, 1440 × 900, zoom set, notifications off.
- ☐ Demo shop rebuilt recently (check the date on /demo), or a prepared trial shop.
- ☐ Phone charged, Do Not Disturb on, screen recorder ready, a Bluetooth printer paired (for N5).
- ☐ Barcode scanner (USB) and sample products with barcodes for scanning shots.
- ☐ Script beats open on a second screen; say the menu path out loud.
- ☐ End card: "Next video: ..." plus links to /demo and /register.
- ☐ Titles follow the pattern "Budget Pro | B3 · Customers at the till".
